Disability Breakdown - LA and National

Ethnicity F

The proportion of EF starts self-identifying being from a Mixed or Multiple; Asian; African; Caribbean or Black; and Other ethnic group is 1.6% compared to a national EF figure of 3.1%

Ethnicity Breakdown - LA and National

Notes

- A. Gender comparison figures are from the Annual Population Survey (APS) - 16-24 employed by gender April 2016 to March 2017.
- B. This table shows the gender breakdown of the frameworks with the highest number of starts in the Local Authority. Disclosure control has been applied (marked with *) where figures are less than 5 or where such figures can be identified through differencing.
- C. Some Local Authority rates may be based on small numbers.
- D. The figures quoted in this report are in response to our disability disclosure question. This is aligned to the wording recommended by the ECU after extensive consultation with disability partners, modern apprentices, training providers and employers.
- E. Disability comparison figures are from the Annual Population Survey (APS) - Disability rate in the 16-64 population April 2016 to March 2017. At a Local Authority level, the 16-24 disability rate in the population is unreliable due to small sample sizes.
- F. Ethnicity comparison figures at a Local Authority level are from Scotland's Census (2011) (the Annual Population Survey data ethnicity figures at LA level are unreliable to due small sample sizes). The ethnicity rate for Scotland is from the Annual Population Survey (16-24 population).
- Disclosure control has been applied where figures are less than 5 or where such figures can be identified through differencing. Disclosure controlled figures are replaced with an asterisk (*).**
